

Welcome to America's largest farmer-led, farmer-focused convention & trade show!

Get ready to GROW BEYOND! your expectations as the American Soybean Association (ASA), National Corn Growers Association (NCGA), National Association of Wheat Growers (NAWG), National Sorghum Producers (NSP) and Association of Equipment Manufacturers (AEM) welcome you to the 2018 Commodity Classic.

Why GROW BEYOND? Because Commodity Classic is all about opportunity, achievement and being around people who share your thirst for knowledge and your passion for agriculture.

Where you can gain the insight to GROW BEYOND what you thought your farm could do. Where you can GROW BEYOND by meeting other great farmers and being inspired by different ideas and groundbreaking innovation.

At the 2018 Commodity Classic, you can GROW BEYOND! by taking part in:

- An outstanding line-up of educational sessions that will challenge you to think differently about your farm
- A huge trade show with the latest technology, equipment and innovation
- The inspiring and thought-provoking General Session on Wednesday morning that will leave you energized and proud to be in agriculture
- Programming on the Main Stage on the Trade Show Floor
- Thursday's Evening of Entertainment featuring World Classic Rockers
- Important policymaking sessions for your commodity association
- Networking opportunities with other farmers from across America

Keep this booklet (and the accompanying floor plan/schedule insert) with you so you don't miss a thing. Download the 2018 Commodity Classic mobile app at the iTunes app store, Google Play store or visit CommodityClassic.com/app.

Be sure to wear your badge everywhere—and take it home with you!

Your badge is your admission ticket to the trade show and all sessions.

After you get home, your badge number gives you access to the online video library that includes all educational sessions offered on the days for which you're registered.

Enjoy your farmer time here in Anaheim and thanks for joining us as we all GROW BEYOND! and learn, network and celebrate together.

Special thanks to the committee members for their commitment and hard work on the 2018 Commodity Classic.

CHARITY PARTNER

Help us *Set the Table*™ with this year's charity partner!

Commodity Classic has teamed up with Feeding America for a second year as our charity partner. Feeding America works with U.S. food banks to

distribute food to more than 60,000 food pantries. America's family farmers produce grains and oilseeds that help provide an abundant and reliable food supply for our nation and the world. Help us reach our goal and together we can Set the Table[™] for a hunger-free America.

HOW TO DONATE: Donations can be made online through the Commodity Classic website or mobile app. Please make your donation by 3:00 p.m., Thursday, March 1.

All Commodity Classic events are held at the **Anaheim Convention Center**. Some association and ancillary events are held at the Anaheim Marriott and the Hilton Anaheim, adjacent to the Anaheim Convention Center.

TUESDAY, FEBRUARY 27

EARLY RISER SESSION

Commodity Prices: There's a 100% Chance That No One Knows

Sponsored by Advance Trading, Inc.

7:00 a.m. - 8:00 a.m. • Room 204

Coffee and breakfast baked goods provided.

SPEAKER: Dave Fogel, Ag Risk Management Consultant, Advance Trading, Inc.

A pivotal characteristic of this year's farming trends finds farmers letting their losses run against them before making a cash sale. At the same time, farmers

miss out on the higher price opportunities by selling too guickly when emotions interfere with decision-making efforts. While it is human nature to hear what one wants to hear on price action, this session will address the differences between the real news, the fake news, the emotions involved and how each of those affect proper management of farming and production. This session teaches farmers how to build a simple-to-use plan to produce solid results in today's marketing environment.

LEARNING CENTER SESSION

Learning Center Sessions are in-depth discussions of current issues and topics that have a direct impact on your bottom line.

The Ag Economy Barometer: Lessons from 2017 and Strategies for 2018

Sponsored by Purdue University Center for Commercial Agriculture

8:15 a.m. - 9:30 a.m. • Room 204

SPEAKERS: Jason Henderson. Ph.D., Associate Dean and Director, Purdue Extension; James Mintert, Ph.D., Professor, Department of Agricultural Economics, and Director, Center for Commercial Agriculture, Purdue University; Fred Seamon, Managing Director, CME Group; **David Widmar**, Senior Research Associate, Center for Commercial Agriculture, Purdue University

Crop budgets and commodity prices in early 2017 were a near repeat of the tough financial conditions producers faced at the beginning of 2016. However, producers were more optimistic in

early 2017. From attendance at land auctions to activity at equipment dealerships, anecdotal evidence early in 2017 hinted that producers were hopeful about what 2017, and beyond, had in store.

In this session, a panel of experts from Purdue University and CME Group will share the key lessons from 2017 and help producers plan for the financial realities of 2018. It will feature the latest data from the Purdue/CME Group Ag Economy Barometer, providing an update on producers' management plans and expectations for 2018.

8:15 a.m. – 9:30 a.m.

7:00 a.m. – 8:00 a.m.

MINI WHAT'S NEW SESSIONS

8:15 a.m. - 9:45 a.m. • Room 207

During this fast-paced 90-minute window, exhibitors will provide brief, five-minute introductions to their newest innovations. Listen to their presentations and then visit these companies on the trade show floor to learn even more.

LEARNING CENTER SESSION

Locking in Your Legacy: What to Anticipate in Ag 2028

Sponsored by Syngenta

9:45 a.m. - 11:00 a.m. • Room 204

SPEAKERS: Aaron Deardorff, Head of Digital Agriculture Solutions North America, Syngenta; David Hollinrake, President, Syngenta Seeds, LLC; Jerry Welch, Publisher of Commodity Insight; Vern Hawkins, President of Syngenta Crop Protection Inc.

Growers have experienced significant changes in their farming operations over the years. From changing pest pressures and

unpredictable weather conditions, to precision planting and new technologies, farming today isn't the same today as it was 10 years ago. Experts who study farming trends and technologies predict even more dramatic changes in agriculture in the next decade. What will the scope of farming look like in the future? This session will explore the factors — like weed resistance, ecological changes and high-tech solutions — and identify the key strategies and transformative technologies in the pipeline that growers can use to ensure their farms are set for a more longterm, successful future.

The General Session is where you truly experience the importance of Commodity Classic. Throughout the session, there is a strong sense of common purpose with a combination of inspiration, information and insight.

Comedian Mark Mayfield returns to the stage as our emcee. Joining Mayfield to provide a perspective on today's agriculture will be NCGA President Kevin Skunes, ASA President John Heisdorffer, NAWG President Gordon Stoner and NSP Chairman Don Bloss. Additionally, there will be an update from the Association of Equipment Manufacturer Ag Sector board member Bill T. Hurley.

9:00 a.m. – 11:00 a.m.

Sonny Perdue came by his knowledge of agriculture the old fashioned way: he was born into a farming family in Bonaire, Georgia. From childhood, and through his life in business and elected office, Perdue has experienced the industry from every possible perspective. Uniquely qualified as a former farmer, agribusinessman, veterinarian, state legislator, and governor of Georgia, he became the 31st United States Secretary of Agriculture on April 25, 2017.

The session concludes with an appearance by **Keni Thomas**, a Staff Sergeant with the Army 3rd Ranger Battalion who was deployed to Mogadishu, Somalia in 1993 as part of the elite special operations package Task Force Ranger. Keni and his fellow rangers distinguished themselves in an eighteen-hour firefight that would later be recounted in the highly successful book and movie *Blackhawk Down*. Keni will captivate you with an incredible story of extraordinary individuals and how they fought to bring each other home.

Don't miss this event that embodies the spirit pushing farmers to "Grow Beyond!"

3:30 p.m. – 4:30 p.m. Ag Keynote: What Your Fertilizer Dealer Won't Tell You

Brian Hefty

Sponsored by Topcon Agriculture

SPEAKERS: Brian Hefty and Darren Hefty, Ag PhD in Baltic, S.D.

Other than cash rent, your biggest expense is likely fertilizer, but are you fertilizing correctly? Talk to any high yield farmer about big yields, and you'll likely spend 90 percent of the conversation on fertility. It's not about spending more. It's about spending your fertilizer dollars wisely. We'll help you understand soil and plant tissue tests yourself, so you don't need to rely solely on others to make your most valuable decisions.

LEARNING CENTER SESSIONS

LEARNING CENTER SESSIONS

Grain Markets and The Hotel California

Sponsored by DTN/The Progressive Farmer

12:30 p.m. – 1:30 p.m. • Room 204

SPEAKER: Darin Newsom, Senior Analyst, DTN/The Progressive Farmer

Grain markets seem to have checked into someplace they like. A place they can never leave. Increasing global stocks and tentative world trade agreements continue to hold grain prices near multi-year lows, looking for a passage back to the place they were before. Attendees to this session will gain a better understanding of market structure, market types, and how all of this intertwines with standard supply and demand information.

Ag Technology: Shaping the Now and the Future of Farming

Sponsored by WinField United

12:30 p.m. - 1:30 p.m. • Room 207

SPEAKERS: Jim Hedges, Senior Director of Strategy and Insights, Ag Technology, WinField United; Joel Wipperfurth, Ag Technology Applications Lead, WinField United

Ag technology is an investment, but the risk of not adopting it could be more costly. Farmers have access to advancing technology such as in-season satellite imagery, tissue sampling data analysis, forecasting and modeling tools and spray drift monitoring, among other precision agriculture tools. Ag technology gives farmers complete access to a year-round look at their fields to help them develop precise, individualized crop management strategies and make in-season decisions to produce and protect maximum yield potential. This session will provide a state of the ag tech industry update and lend insight into how future innovations will shape the tools available to farmers and their operations.

Leaving a Legacy on Your Farm Through the Soil

Sponsored by American Society of Agronomy's International Certified Crop Adviser (CCA) Program; NACHURS; The Fertilizer Institute

12:30 p.m. - 1:30 p.m. • Room 210

SPEAKERS: Tom Connors, 2016 4R Advocate and Grower from Shipman, Illinois; and Dale Cowan, 2016 International Certified Crop Adviser of the Year, 4R Nutrient Management Specialist, Senior Agronomist for AGRIS and Wanstead Cooperatives from Ontario, Canada

The intersection of soil health, 4R (Right fertilizer source, at the Right rate, at the Right time and in the Right place) nutrient management, and conservation practices: learn how these stewardship programs work together as a system. "Just one" is not the answer! You are not alone in this long-term process of ensuring your farm's future for generations to come. A Certified Crop Adviser can help you plan and implement the agronomic practices that keep nutrients in your field, improve crop yields, and increase on-farm profit. Learn more about the nutrient management specialty along with some nutrient management strategies. The 2018 recipient of the International Certified Crop Adviser (ICCA) of the Year Award will be recognized during this session. The award celebrates outstanding individual proficiency and industry leadership.

Practical approaches for incorporating soil health building practices need to consider climate, soil type, rotation, herbicide program, fertility, yield, timing and equipment – there is nothing simple about this system! This is why it can be overwhelming to get started with using some of these practices. North Dakota consultants and farmers along with NDSU research and extension will use a panel format to share how we are using these practices along with the thought process behind why we choose specific cover crop mixes or tillage practices. We'll also talk about ideas for equipment modifications.

Consider Corn Challenge

Sponsored by National Corn Growers Association (NCGA)

1:45 p.m. – 2:45 p.m. • Room 210

SPEAKERS: **Amie Gianino**, Chief Strategy Officer and Vice President of Market Development, NCGA; **Jim Bauman**, Director of Market Development, NCGA; **Nathan Danielson**, Principal, BioCognito

Discussion of NCGA's "Consider Corn Challenge," an open innovation contest designed to identify new ways to convert corn and/or existing products made from corn into economically viable bio-sustainable chemicals. The contest was open to U.S. and internationally based submissions to identify ideas with the most potential to add future incremental corn grind. NCGA will publicly announce winning submissions for the first time during this session, along with background information on each project. Learn about new and potential growth opportunities for corn within the bio-sustainable chemical industry.

3:00 p.m. - 4:00 p.m. • Room 204

SPEAKER: **Bryce Anderson**, Senior Agriculture Meteorologist, DTN/ *The Progressive Farmer*

While some areas had rough weather events in 2017, crop conditions were generally favorable. Will we see a seventh season of generally good weather, and high crop production, in 2018? Come hear the latest expectations for spring planting and the growing season, plus an update on weather conditions for grain production regions around the globe.

Anderson and the DTN weather team build crop forecasts based on public weather and commercially available data and the company's network of some 5,000 on-farm weather stations. They continue to lead the nation on discerning what early weather pattern signs spell for crop conditions, and market prices, in the U.S. and around the globe.

Around the World With U.S. Soy

Sponsored by U.S. Soybean Export Council (USSEC)

3:00 p.m. - 4:00 p.m. • Room 207

SPEAKERS: Jim Sutter, CEO, USSEC; Rosalind Leeck, Director, Market Access, USSEC

Learn about the importance of U.S. soy exports. What are the tactics and strategies that the U.S. soy industry uses to create a preference for U.S. soy? Sixty percent of the soybean crop goes overseas. This year, more than 68 million metric tons of U.S. soy from our 569,998 soybean farmers will reach international markets. Serving over 80 countries around the world, our customers choose U.S. soy for our exceptional composition, consistent supply, sustainable farming practices, and innovation. Join us on the journey of U.S. soy.

From Farm Field to Capitol Hill: Implementing and Advocating for the Right Practices

Sponsored by The Fertilizer Institute

3:00 p.m. – 4:00 p.m. • Room 210

SPEAKERS: **Grant Strom**, 4R Advocate and Producer from Dahinda, Ill.; **Adam Dexter**, Certified Crop Adviser and 4R Advocate; **Clark Mica**, Vice President Legislative Affairs, The Fertilizer Institute; **Ashley Maybanks**, Government Relations Coordinator, Illinois Chapter of The Nature Conservancy

Whether it is the Farm Bill, state legislation or local watershed plans, as constituents, farmers are the best advocates to ensure the right policies are in place for agriculture. But, to be a good advocate you need to walk the walk, not just talk the talk. Good advocates take action, both in the field by implementing the right practices and on Capitol Hill by working to educate policymakers. Join us to hear from a panel of experts on how pairing conservation and advocacy through 4R Nutrient Stewardship (Right fertilizer source, at the Right rate, at the Right time and in the Right place) can benefit your entire bottom line.

EARLY RISER SESSION

The Great 2018 Grain Marketing Debate: **Rising Tide or Everyone for Themselves?**

Sponsored by Corn+Soybean Digest and Farm Futures magazines; Farm Progress; Channel Seed

7:00 a.m. – 8:00 a.m. • *Room 204* Coffee and breakfast baked goods provided.

SPEAKERS: Bryce Knorr, Senior Market Analyst, Farm Futures; Ed Usset, Grain Marketing Specialist, Center for Farm Financial

Management, University of Minnesota; Matt Bennett, Marketing Consultant, Channel Seed

Bryce Knorr

Some years grain markets cut across party lines, moving grain prices higher and lower in tandem. Other years, individual fundamentals of supply and demand affect each market differently. What type of year will 2018 be, and how can you position your marketing plans for success? Three experienced grain market experts will debate marketing strategies in a format that is both educational and entertaining. Audience participation is encouraged to make sure key questions are explored from all sides and opinions. Our speakers' insights will address current market trends and future indicators, with a focus on corn, soybean, wheat and sorghum markets.

LEARNING CENTER SESSIONS

The Ultimate Watch List for 2018 Grain Marketing

Sponsored by Stewart-Peterson

8:15 a.m. - 9:15 a.m. • Room 204

SPEAKER: Naomi Blohm, Senior Market Analyst, Stewart-Peterson

Join veteran Senior Market Analyst Naomi Blohm as she explains the nine grain marketing fundamentals you need to watch as you prepare to price your corn, soybeans, sorghum and wheat. She'll incorporate various futures and options strategies you can use (and understand) to supplement your marketing plan, leaving you more confident than ever before regardless of which grain marketing scenarios unfold.

The Rise of Rural America: What's on the Horizon

Sponsored by Farm Credit

8:15 a.m. - 9:15 a.m. • Room 207 AB

SPEAKERS: Brian Cavey. Senior Vice President of Government Affairs, CoBank; Gary Matteson, Vice President of Young, Beginning, Small Farmer Programs and Outreach, Farm Credit Council

The 2016 election shined a light on rural America and the issues affecting it. What's it going to take to rebuild rural America? How do we address the economic divide? This session will address how policy and public/private funding efforts can affect rural America now, while securing the future for agriculture and the rural communities it calls home. Our speakers will bring a unique perspective not only on policy, but also how rural America is impacting the future for young and beginning farmers. The session will focus on solutions and ways to impact the future of agriculture and rural America.

The Bee & Butterfly Habitat Fund: How Growers Can Support Honeybee Health and Monarch Recovery

Sponsored by National Corn Growers Association (NCGA)

8:15 a.m. – 9:15 a.m. • Room 207 CD

SPEAKER: Peter Berthelsen, President at Conservation Blueprint, LLC and Partnership Coordinator for the Bee and Butterfly Habitat Fund

NCGA is working with The Bee & Butterfly Habitat Fund to recruit growers into conservation programs aimed at increasing habitat for pollinators and Monarchs—and helping mitigate criticism of production agriculture as an influence on colony collapse disorder and declines in Monarch populations. Early results of the Honey Bee Health Coalition's "Bee Integrated" program will be shared. Growers will learn about eligibility for pollinator pilot programs to enhance their Conservation Reserve Program.

Six Secrets to Producing High Yielding Soybeans

Sponsored by Illinois Soybean Association Checkoff Program

8:15 a.m. – 9:15 a.m. • *Room 210*

SPEAKER: Fred Below, Ph.D., Professor of Plant Physiology & Principal Investigator, University of Illinois

Dr. Fred Below will present research results on "The Six Secrets of Soybean Success", a concept focused on identifying strategies for producing high-yield soybeans. The results come from research he has conducted since 2012 with funding from the Illinois Soybean Association Checkoff Program and other industry partners. The Six Secrets approach demonstrates how growers can bring together technologies and management practices for increasing soybean yields based on which combinations deliver the greatest yield and return on investment. Additionally, Dr. Below will share key insights on variety selection and supplemental nitrogen application on soybeans.
